

Quality Control Inspector U.S. Citizenship Required

CTL-SystemWare, a division of Charon Technologies, LLC, provides turnkey RF product solutions in the areas of systems control, signal acquisition and signals analysis. Our product lines include dynamic solutions for signals acquisition and signals analysis, frequency management, Technical Surveillance Countermeasures, Signals Intelligence, Tempest, image/data rastering, hardware control and remote monitoring. Our expertise allows us to rapidly provide solutions in agile and challenging environments. **Successful candidates must be able to follow ITAR compliance; therefore U.S. Citizenship is required and must also be willing and able to obtain a security clearance and pass a pre-employment drug screen.**

We are seeking a Quality Control Inspector to perform inspections of electronic sub-assemblies, full system assemblies, in-process production items and manufactured cables. The role requires a full understanding of quality management systems and their supporting processes. In addition, the QC Inspector responsibilities also include the management and maintenance of lab test equipment and select tools.

Candidates must possess solid interpersonal as well as excellent oral and written communication skills.

Responsibilities and Duties

Ideal Candidates will be proficient with:

- Performing tests and verifications using small hand tools, calipers, multimeters, signal generators, spectrum analyzers, oscilloscopes and other test equipment
- Inspecting and testing new and manufactured parts or products to certify quality and adherence to ISO specifications
- Performing receiving inspections of materials, supplies, and equipment made by the company, vendors or customers
- Accurately recording test results of all testing procedures and properly documenting in various forms of digital and hard copy media
- Generating test failure reports and test data as required
- Performing necessary maintenance on laboratory tools and equipment
- Assisting engineers and production personnel in formulating test, calibration, repair, and evaluation plans and procedures

Qualifications and Skills

Preferred skills will include:

- Strong understanding of Windows OS; Microsoft Word, Excel and Access
- PC related troubleshooting experience
- Knowledge of RF System's theory; assembly and troubleshooting experience
